

Fibreglass GRP Ladders are manufactured using Fibreglass Pultruded Profiles, which offer lightweight, chemical resistance, easily installed solutions to vertical access. **Fibreglass GRP Ladders** can be supplied in any specified length, and can be equipped with safety cages, walk thru and returns.

The Fibreglass GRP Ladder stringers are pultruded, easy grip, channel or box section. The **Fibreglass GRP Ladder** rungs have an anti-slip serrated surface. The rungs are both mechanically jointed and epoxy glued for safety.

All standard or special stainless steel fixings can be supplied i.e. wall mount brackets, floor mount brackets, wall stand off assemblies, hoop/cage mounting fixings, walkthrough floor mount fixings.

You can be sure that our equipment will still be safe and sound when traditional ladders are decaying. The food and electrical sectors can also benefit from using fibreglass because it is hygienic, and is such an excellent insulator.
